Transforming Riga's gig economy, one swipe at a time

Riga Has a Service Crisis

What Residents Face Daily

- Waiting days or weeks for urgent repairs – pipes burst, heaters fail, locks break
- No-shows from ss.lv contractors who ghost after initial contact
- Scams and unreliable workers with no verification or ratings
- Winter emergencies: snow removal needs immediate response
- Language barriers complicate finding trustworthy help

What Meisters Struggle With

- Inconsistent gig flow – feast or famine scheduling
- Competing on price-only platforms like ss.lv
- No reputation system to showcase quality work
- Payment disputes and delayed compensation
- Spending hours hunting for jobs instead of working
